

ANTIOXIDANT REFOLIATOR

Post-Peel Balm

Balsamum Post Decorticationem

- THE NEWS:** **Antioxidant Refoliator** provides antioxidant replenishment following exfoliation treatments, including microdermabrasion, chemical and laser peels, scrubbing grains, and shaving.
- PERFORMANCE:** A pioneering formula, with rapid absorption properties, restores nutrients to the stratum corneum (the reservoir of antioxidant activity), depleted by peels and other exfoliating treatments.
- THE DIFFERENCE:** Patented liposome delivery system encapsulates key ingredients in microscopic spheres, which are engineered to deliver maximum benefit at the cellular level.
- THE BENEFIT:** Works on a cellular level to restore skin vitality following aesthetic treatments and procedures that accelerate exfoliation.
- KEY INGREDIENTS:** **Roxomes.** Liposomes encapsulating the first repair enzyme, isolated from a tiny mustard plant, that has been shown to protect the cell's genetic material from free radical damage. Roxomes aid in the removal of oxidation in the cell's nucleus and its energy-generating mitochondria.
- Thiotaine.** A potent and stable lab-formulated rendering of a botanical amino acid, shown to promote skin energy and block the activation of two enzymes, elastase and matrix metalloproteinases (MMPs), which degrade collagen and elastin, and destroy the skin's supporting structure, leading to wrinkle formation.
- Vitamin C and Vitamin E** (in oil-soluble form). Vitamin C, essential for stimulating collagen production, accompanied by Vitamin E, its natural regenerating partner. In synergy, the two maintain vital antioxidant levels.
- USAGE:** Apply one metered dose to face; follow with Barrier Repair Formula. Recommended for all photo-damaged skin types after exfoliation treatments.

1.7 oz. € 50 ml \$55.00

Remergent is available through preferred dermatologists and plastic surgeons.
