

## Remergent

### THE NEWS:

Everyone knows UV rays cause photoaging. But – how? UV light actually attacks and damages the skin's DNA, the very foundation of elasticity and firmness. This imbalance contributes to wrinkled, dry, discolored and slack skin. These “solar scars” may even predispose people to skin cancer. While certain first-aid triggers are inherent in DNA, our ability to self-repair declines with age and is impaired by the degree of cumulative exposure.

**Remergent** skincare products offer a radical approach to countering UV damage: reprogramming the skin's genetic code with customized enzymes applied in an efficient, focused way. Each **Remergent** product features evolved DNA repair enzymes delivered in ph-sensitive liposomes, designed to help cellular components of skin recover from past damage. When paired with sunscreen, Remergent offers an innovative yet simple two-pronged approach to renewing sun-damaged skin: repair and protect.

All **Remergent** products provide DNA science, and benefits. For ultimate benefit, **DNA Repair Formula** serum is a potent, once-a-day solution to encourage the skin's DNA repair mechanism to self-correct, treat past damage, and resist future injury when used with a sunscreen. **A.M. Moisture** and **High Intensity** provide the best of both worlds – DNA repair science and broad-spectrum sunscreen in one.

### PERFORMANCE:

Developed to fill critical voids in current skincare therapies, Remergent products activate self-healing, reverse skin cell dysfunction and maximize results for sustained skin health.

Remergent products feature superior, scientifically controlled ingredients in combinations that have been clinically tested and proven for maximum results.

### THE PHILOSOPHY:

Skin repair and recovery are essential components to fighting damaging effects of the sun, along with religious use of broad-spectrum sunscreen.

### THE BENEFIT:

**Remergent** skincare represents a thoroughly different way to address the effects of photo-damaged skin, using advancements from the genomics' revolution to reprogram, repair and restore the skin's DNA. As a result, the skin returns to a more youthful state – firmer, even in tone and texture, fewer lines and wrinkles.

### PRODUCTS:

**Barrier Repair Formula**  
**DNA Repair Formula**  
**Antioxidant Refoliator**  
**Clarifying Concentrate**  
**Microcirculation Therapy**  
**A.M. Moisture**  
**High Intensity**

### USAGE:

Remergent products may be used on their own or in conjunction with one another as part of a daily skin care regimen for long-term re-programming of the skin. All seven multi-tasking products are based upon years of DNA research, developed by laboratory scientists at the cutting edge of product innovation.

**Remergent** is available through preferred dermatologists and plastic surgeons.

*Remergent™ is formulated by AGI Dermatics, the bio-pharmaceutical laboratory that has led the research of DNA repair of the skin for more than 20 years. Founded by Daniel B. Yarosh, PhD, AGI Dermatics specializes in skin photobiology, dedicating research and development to DNA repair, solar impact on the immune system, and cell-signaling in skin. The company's application of groundbreaking active ingredients and meticulously engineered liposome delivery systems is validated in controlled clinical studies and published in dozens of peer-reviewed scientific and medical journals.
